(Tutor)

2018

Tomorrow
Saturday
15th September
9.00-12noon

Free turning morning at the workshop.

Open to all paid up members of current courses.

You are welcome to attend the workshop tomorrow for skills practice, to complete a project or make a flying start on your next project

DUTY OFFICER - ANDRE`

This week's useful video clip

**MORE ABOUT THE SKEW TOOL
(TOOL FOR THIS MONTH)**

Sessions this month start with a 10- 15-minute practice time using the skew tool. Last Saturday **ROBERT WISELEY** spent a couple of hours sharpening all our skews. Many thanks to you Robert.

By the end of this month we expect that everyone is better skilled in sharpening their own skew chisel.

Have another look at Terry Scott demonstrating the skew sharpening process. All members should consider this visit to **You Tube** as part of this month's skew training programme.

OK go to Google and then type: "How to Sharpen the Woodcut oval skew" (3.19) Observe the technique as presented by Terry Scott and note the advice about jig settings.

September is the month for increasing our knowledge about, and confidence with, the use of the skew chisel. PRACTICE – PRACTICE - PRACTICE

THIS WEEK'S TOP TURNINGS

BENCENT's bowl-on-a-stand is a winner!

A lot of meticulous care went into this project.

OSCAR's skill in turning replication (getting one side of the gavel to match the other side) was put to the test and he passed with top honours.

The NGARUAWAHIA Volunteer Fire Brigade will be mightily chuffed with this gift.

THIS WEEK'S COMPLETED PROJECTS

GARY continues to make his mini bowls with macro wood. He seems to be on a mission to make the walls thinner and even thinner than the one before. He's winning too!

MICHAEL made a great job of his numberless clock.

Lots of successful plug cutting and snug fitting in this project.

JOHN had a shot at a lidded pot and this is what he got!

Pretty cool effort eh what?

Skillsets from our new turners are tracking along really well.

Well done you two!

Here's another first attempt at a lidded pot. **DENIS** must have been influenced by an acorn in determining the final shape.

MALCOLM the pen maker could almost turn out a couple of these cigar pens in a short time with his eyes closed now. Confident and careful work here.

PROJECT - Make a child's toy

There's still **86 days** for you to make to make a child happy at Christmas.

Good friend of the club **BRUCE MACDONALD** has made a "flying" start with his toy making with a couple of helicopters.

Need an inspiration with your toy making?

OK then search through the folders that **HEATHER** has made available.

If you borrow one of the plans you must record your details on the loan sheet.

COUNTDOWN: 86 days until the deadline of 9th December.

Prior to moving to Auckland **KATRINA** completed a recycled-rimu platter.

Bon Voyage and happy years of turning.

Our **RICHARD** has just acquired a brand-spanking-new “Saturn” lathe.

Methinks he will be spending even more hours in his workshop from now on. Here’s a quality indicator fresh from the “Saturn”

STEPHEN used Chinese elm wood to make his deeply undercut rimmed bowl. This was a real sanding challenge but perseverance paid dividends.

This kauri project is a strong indicator that wood turning is going from good to great for our **ROBBIE**.

- Developing a keen eye for interesting shapes.

A STUNNER!
From **ROBERT WISELEY**

Can you figure out how this special turning project was done? No? Have a chat to Robert.

AARON's first successful venture into plug cutting. Woo Hoo! What a beaut!

ROSS worked long and hard to remove all traces of stria. Goodonya Ross.
